

## GOVERNMENT SERVICES

Qube has consolidated a range of experience and capabilities in the Government Services business and is well positioned to provide integrated logistics and service support to the public sector.

Qube currently supports the Australian Antarctic Division, the Australian Border Force, and the Tasmanian Government's TT-Line. We develop and operate logistics infrastructure including warehouses, support bases and specialist handling equipment. Qube is committed to working collaboratively with our clients from the idea phase through to the implementation and successful execution of the project.

With a domestic network of owned and managed assets, trusted global suppliers, and a solid financial background, our transparent, low risk service delivery models ensure Qube remains the preferred long term logistics provider.

### Qube Government Services:

- Operates in over 40 ports and 75 locations throughout Australia, New Zealand and South East Asia;
- Co-ordinates from a centrally located Singapore office;
- Provides specialist on ground support;
- Appoints key contract managers to support multi ship, multi port deployments;
- Tailors accounting and reporting systems to ensure timely invoicing and 360 degree reporting;
- Ensures a low risk, value for money, and fully integrated service.

Qube has extensive experience providing logistics support in challenging and austere environments. We manage:

- Naval Vessel Husbandry: supply of all port and support services to international navies;
- Camp and Garrison Support: including catering, facilities management and maintenance, security and fuel supply;
- Expeditionary Logistics: supporting 100 – 1,000 personnel in remote training and theatre;
- Environments Fuel Supply and Distribution;

- Air Charter;
- Land Transport;
- Quarantine Cleaning;
- Rapid Response Humanitarian Logistics (Disaster and Crisis Management).

### Specialist support services include:

- Supply base functions including stevedoring, labour hire, equipment supply and inventory control;
- Bio-secure approved facilities and Quarantine approved wash bays;
- Import into Australian waters for all vessels and barges to operate within Australian law;
- Full vessel agency functions for all vessels and barges for all port calls;
- International air and sea freight forwarding;
- Third party service requisitioning;
- Crew changes and management;
- Inventory management tailored to customer requirements;
- Specialist trade services to support the operations, hot works, mechanical etc;
- Local and interstate transport.

## PROJECT SUPPORT TO HMAS CANBERRA'S FIJI DEPLOYMENT

---

Qube was able to support HMAS Canberra's recent short notice deployment to Fiji. HMAS Canberra, one of two new landing helicopter dock (LHD) ships in the Royal Australian Navy (RAN), was due to undertake its first call to Brisbane when it was committed to Operation FIJI ASSIST 2016 in the aftermath of Cyclone Winston.

To better facilitate the loading of personnel and equipment, Qube was able to organise a berth at Qube's Fisherman Island facility. The Qube facility had the available space to marshal embarking personnel and critical supplies, and this support operation took place over a concentrated 48 hours.

Plywood, roof sheeting and cement bags were among the items received for subsequent loading on HMAS Canberra. Qube managed the loading of aid containers received at Fisherman Island that required lifting onto the flight deck.

## LOGISTICS SUPPORT TO US DOD POW/MIA ACCOUNTING AGENCY (DPAA)

---

In April 2016, Qube Government Services was awarded a contract to support DPAA on a mission to recover missing personnel from a recently located downed WWII bomber in the swamp in Cape Wom, Wewak, in East Sepik Province, Papua New Guinea.

Qube met with the DPAA mission team leader in Wewak on 3rd April 2016 to confirm the mission requirements and scope of works, and a site recce was conducted the following day. The crash site is approximately 600 metres from the nearest roadway, situated in dense jungle and swamp.

Qube was tasked with arranging and managing a local labour force of 50 workers and providing equipment (PPE and tools), 24/7 on site security, and material handling equipment to assist with the loading and transportation of DPAA's equipment.

## QUBE GOVERNMENT SERVICES – UPDATE – MAY 18

### Carrier Support – US Navy

Qube deployed a management team in March to Vietnam, where they supported the US Navy in visiting Da Nang – the first time a US aircraft carrier had been invited into Vietnam since the Vietnam War. The support of the three vessels meant starting on the engagement in October last year – doing pre-deployment visits to determine the best port and working every day since then to ensure that the visit went smoothly.

Qube’s Contract Manager for Government Services Martin Flower noted that “We had to have the ability to move 1250 people an hour from ship to shore and bus them around Da Nang. We were working 19 hours a day for 4 days straight.” The Qube team coordinated 8 water taxis and 44 busses running all day, coordinated security to ensure that the port was safe before the ship docked, and ensuring that everything went to plan once the aircraft carrier (carrying some 92 aircraft and 5500 personnel) came into port to meet the 155 accredited media waiting for their arrival.

### Pacific Partnership – Indonesia

Qube Government Services supported the US Navy engagement exercise in Bengkulu, Indonesia in the March-April timeframe. The USNS Mercy provided a range of medical support as part of the Pacific Partnership mission.

Pacific Partnership is the US Navy’s humanitarian and civic assistance mission conducted with and through partner nations, nongovernmental organizations and other U.S. and international government agencies to execute a variety of humanitarian civic action missions in the Pacific Fleet area of responsibility. Support that was provided included water taxis, barges, waste management, general transport and personnel support tasks.

### US NAVY – HUSBANDRY SUPPORT PANEL

---

The US Navy recently appointed Qube to its Husbandry panel until 2023. Qube is now able to provide husbandry support throughout South Asia, SE Asia, Australia, New Zealand and the Pacific.

This allows Qube to expand the support it has provided since 2016 and we look forward to welcoming the US Navy to the sites we manage throughout Australia and New Zealand.
