Three points of contact keeps us all intact.

This year, we've seen too many team members fall from vehicles, equipment and structures. This has caused fractured ankles, hips, skulls and even backs. Let's remember that in our line of work, complacency comes at a serious cost. It's easy to forget the hazards that surround us every day.

Always take your time and remember::

- ✓ Maintain three points of contact at all times.
- ✓ Use all steps when entering or exiting.
- ✓ Be aware of your surroundings and uneven ground.

- ✕ Jump from vehicles, stairs or structures.
- ✕ Enter or exit a vehicle while it's moving.
- ✕ Carry anything that prevents you from using handholds.

QUBE SAFE.
